Professional Summary

Full Stack Developer with a degree in Systems Analysis and Development from UFPR and experience in web applications, APIs, automation and data. At TRC Taborda, I develop Vue.js and Go solutions and maintain C#/.NET, Python and PHP projects. At Banco do Brasil, I developed enterprise applications, LLM and RAG integrations, data workflows and maintained SUSE Linux environments.

Technical Skills

Languages: Go, C#, Python, PHP, TypeScript and Java.
Frameworks: Vue.js, .NET, Node.js, React, Spring Boot and React Native.
Data and AI: PostgreSQL, MySQL, ETL, Power BI, LLM and RAG integrations.
Integrations: REST APIs, workers, messaging and RCS.
Infrastructure and tools: Git, Docker, Kubernetes, SUSE Linux and Google Cloud.

Professional Experience

TRC Taborda – *Junior Developer* Oct 2026 - present

- Develop full stack applications with Vue.js on the frontend and Go on the backend, implementing features and integrations between application layers.
- Perform enhancements and corrective maintenance on projects in C#/.NET, Go, Python and PHP.
- Created Python automation routines and Go workers for task execution and data processing.
- Implement ETL/ELT and bulk data processing workflows involving financial data and information integration.
- Develop integrations with external APIs and messaging solutions, including RCS and Meta's WhatsApp Business Account (WABA).

Banco do Brasil – *Full Stack Developer Intern* Mar 2025 - Jul 2026
Automation and Analytics Team

- Developed and maintained full stack applications with Node.js, Vue.js and PHP, and APIs to integrate systems, internal services and databases.
- Implemented intermediary APIs for LLMs and RAG workflows with vector indexing, retrieval and preparation of enterprise information.
- Developed SQL queries and data models in PostgreSQL, MySQL and DB2, applying ETL/ELT to validate, transform and integrate data.
- Automated tasks and data processing with Python and used Power BI for data analysis and visualization.
- Maintained SUSE Linux servers and application environments, diagnosing and resolving issues in APIs, databases and integrations.

Freelance – *Software Developer* Jul 2026 - present

- Develop web applications and interfaces with React, Java and Spring Boot, implementing features and improvements according to each project's needs.

Public Prosecutor's Office of Paraná – *Intern* Jul 2022 - Aug 2024

- Automated administrative tasks with JavaScript and Google Apps Script and created Google Sheets dashboards to organize and monitor management data.

Education

Federal University of Paraná (UFPR) Aug 2026
Technologist Degree in Systems Analysis and Development - completed.
Capstone - Appunture: developed an acupuncture-point reference app with React Native and Spring Boot, a 3D body map, an AI assistant, OAuth, Google Cloud and an offline-first architecture with data synchronization.

Languages

Advanced English - English Live Corporate, completed in 2022.
