

Gabriel Francelino Voidaleski

Full Stack Developer - [Portfolio](#) · [GitHub](#)

Curitiba, PR | Phone: (41) 99196-7886 | Email: voidalzk@gmail.com

Professional Summary

Full stack developer with a degree in Systems Analysis and Development from UFPR and experience at Banco do Brasil developing APIs, Node.js backends and enterprise applications. Experience with React in freelance projects and occasional use at Banco do Brasil, alongside Vue.js and PHP. Knowledge of JavaScript and TypeScript, frontend-backend integration, relational databases and SQL. Background in implementing features, enhancing applications, troubleshooting and system integration. Experience with Git, Java, Spring Boot and AI integrations. Proactive approach to problem-solving and continuous learning.

Professional Experience

Banco do Brasil - Full Stack Developer Intern

03/2025 - 07/2026

Automation and Analytics Team

- Developed and maintained APIs and Node.js backends for internal enterprise applications, implementing server-side features and integrations required for the solutions to operate.
- Developed full stack web applications with Node.js, Vue.js and PHP, working across system layers and enhancing features used in the bank's internal processes.
- Integrated frontends, APIs, backends, internal services and data sources, connecting application features and supporting information exchange between different enterprise systems.
- Maintained and enhanced applications, implementing improvements, adjusting existing features and fixing bugs based on the needs of internal systems and processes.
- Developed and maintained SQL queries and data models in PostgreSQL, MySQL and DB2, managing and supporting databases and processing and validating information used by applications.
- Developed AI integrations and contributed to RAG architectures, using internal information in automated solutions and workflows connected to enterprise applications.
- Supported SUSE Linux servers, application environments and internal services, and developed Python routines to automate recurring tasks and integrate systems.

Freelance Developer - Software Projects

07/2026 - Present

- Develop web applications and interfaces with React, Java and Spring Boot in freelance projects, implementing features and improvements based on the needs of each project.

Public Prosecutor's Office of Paraná - Intern

07/2022 - 08/2024

- Developed administrative automations with Google Apps Script and JavaScript, reducing manual tasks and streamlining internal processes, and created and maintained Google Sheets dashboards to organize, monitor and visualize management data.

Featured Academic Project

Appunture - Final Degree Project

2025

- Developed an application with React Native and Spring Boot to help acupuncture practitioners look up and identify points on the body.
- Implemented a 3D body map and AI integration to support application use.
- Used Google Cloud infrastructure, secure OAuth authentication and an offline-first approach, enabling application use in settings with limited connectivity.

Education

Federal University of Paraná (UFPR)

08/2026

Technology Degree in Systems Analysis and Development - completed

Technical Skills

Programming languages: JavaScript, TypeScript, PHP, Python and Java

Frameworks and development: React, Node.js, Vue.js, React Native, Angular and Spring Boot

Databases: PostgreSQL, MySQL and DB2; SQL; knowledge of MongoDB and Oracle Database

Infrastructure and tools: Git, GitHub, GitLab, SUSE Linux, Azure, Google Cloud

AI and AI-assisted development: AI integrations and experience coding with Claude, Codex and GitHub Copilot agents

Methodologies: Kanban and Scrum

Languages

Advanced English - English Live Corporate, completed in 2022
